PROFESSIONAL PROFILE

Senior Telecommunications Engineer with Master's degrees in Big Data and Artificial Intelligence, offering over 10 years of experience in the Telco sector. I transitioned from network operations and business analysis (KPI & SLA control for FTTH, RAN, and Site) into Data Engineering, gaining a deep understanding of the data domain. I specialize in building end-to-end data pipelines (Raw to Gold architecture), designing ingestion, transformation, and cleansing processes in Cloud environments (Azure) using PySpark and SQL, ensuring data consistency for Power BI and web-based platforms.

EXPERIENCE

REALE GROUP, Madrid

10/2024 - Present

Job Overview: Responsible for designing data pipelines in Azure Databricks and Data Factory under a Medallion architecture (Delta Lake).

- **Ingestion:** Data integration from Oracle, Microsoft Dataverse, REST APIs (Medallia, Genesys Cloud), and web scraping with Selenium.
- **Transformation & Governance:** Automation of data cleansing and validation (PySpark, SQL), ensuring data integrity via Unity Catalog.
- **Visualization:** Development of business dashboards and reports in Power BI for strategic decision-making.
- **CI/CD:** Managed version control, integration, and continuous deployment using Azure DevOps.

VODAFONE, Madrid

07/2015 - 09/2024

DATA ENGINEER

04/2019 - 09/2024

Job Overview: Operation of an on-premise Big Data cluster (Hortonworks) and development of automation, analytics, and web platforms for network management.

- **Big Data Ops:** Managed and maintained a 30-node Hortonworks cluster for massive network data storage.
- **Data Pipelines:** Implemented ingestion flows using Apache NiFi and processing scripts in Python (Pandas, PySpark, PyHive) to automate reporting, incident ticketing, and scheduled tasks.
- **Web Development (Telco):** Developed internal platforms for alarm geolocation and network incident management, streamlining prioritization and resolution.
- **BI & Automation:** Managed the Power BI portal for monitoring network availability and SLAs. Integrated automated extractions from SharePoint/Outlook to MariaDB using Power Automate.
- **Technical Lead:** Acted as the liaison between Network, IT, and external vendors, providing technical support in process automation and tool design.

DATA ANALYST

07/2015 - 04/2019

Job Overview: End-to-end monitoring of Network Operations KPIs and technical management of SLAs for strategic partners and providers.

- **Telco Business & Network Sharing:** Provided technical management and tracking for infrastructure sharing agreements (Sites, FTTH, RAN, vDSL) with key partners such as Orange, Cellnex, Telefónica, and Huawei.
- **BI Development & Monitoring:** Created Power BI dashboards to monitor mobile network availability and audit contractual SLA compliance.
- **Reporting Automation:** Extracted data from Teradata and MariaDB, developing VBA macros to automate executive reports (Excel, PowerPoint) and alert systems.

EXPERIS (SATEC), Madrid (Vigo)

06/2013 - 07/2015

NETWORK DEPLOYMENT AND OPERATIONS TECHNICIAN

Job Overview: Network incident resolution and end-to-end management of deployment projects across Vodafone Spain's Data Centers.

- **Operations & Deployment:** Coordinated cabling projects and equipment acceptance testing (BTS, DSLAMs).
- **Network Sharing:** Technical management of a nationwide OLT deployment project for a network sharing agreement with Orange.

GRADIANT, Vigo

09/2012 - 05/2013

C++/C# DEVELOPER (INTERN)

Job Overview: Developed an application to monitor physical activity in elderly people using real-time motion detection with the Microsoft Kinect sensor.

ACADEMIC AND COMPLEMENTARY EDUCATION

MASTER'S IN ARTIFICIAL INTELLIGENCE

2025

University of La Rioja

MASTER'S IN BIG DATA AND BUSINESS INTELLIGENCE

2018

School of Industrial Organization (EOI), Madrid

5-YEAR DEGREE IN TELECOMMUNICATION ENGINEERING (ELECTRONICS SPECIALIZATION)

2013

University of Vigo, Vigo

COMPUTER SKILLS

- **Programming:** Python (PySpark, Pandas, Flask), SQL (T-SQL), Bash, VBA, JavaScript/HTML/CSS.
- **Cloud & Architecture:** Azure (Databricks, Data Factory), Google Cloud Platform (GCP), Medallion Architecture, Delta Lake.
- **Data Engineering:** Apache Spark, Apache NiFi, Apache Airflow, Hive.
- **Database & Integration:** MariaDB, Microsoft Dataverse, REST APIs, Web Scraping (Selenium).
- **DevOps & MLOps:** Azure DevOps, CI/CD, Git, GitHub.
- **BI & Automation:** Power BI, Apache Superset, Power Automate.

LANGUAGES AND CERTIFICATIONS

- **LANGUAGES:** English C1, Native Spanish, Native Galician
- **CERTIFICATIONS:** Google Cloud Data Engineer (2024), Google Cloud Associate Engineer (2023), Cisco CCNA (2014), Cambridge English, B2 (2014).
